PROFESSIONAL SUMMARY

- Full Stack Software Engineer with 2+ years of experience building and deploying scalable web and mobile applications across healthcare, HRTech, and enterprise systems.
- Led end-to-end development of real-world products, including a ₹3L+ enterprise platform, managing teams of 10+ members and handling direct client communication, delivery, and production releases.
- Strong expertise in MERN stack, Flutter, and integrating AI/ML systems into practical applications. Proven expertise in system design, scalable backend architecture, and high-performance application delivery in fast-paced environments.

SKILLS SECTION

Languages: JavaScript, Python, SQL
Frontend: React.js, HTML, CSS, Tailwind **| Mobile:** Flutter
Backend: Node.js, Express.js
Databases: MongoDB, MySQL
Tools: Docker, Git, GitHub, Postman
AI/ML: Model Building, Data Processing, Prediction Systems
Other: System Design, REST APIs, Team Leadership, Client Handling

EXPERIENCE

Software Developer (R&D) | Datapro Computers Pvt Ltd **March 2025 - Continuing**

- Led 10+ developers & testers, accelerating enterprise product delivery by 30% while managing end-to-end development lifecycle.
- Designed scalable architectures that reduced future development effort by 40% through modular, interchangeable components.
- Automated business workflows across healthcare, HR, and enterprise systems, reducing manual operations by 60%+.
- Evaluated 10+ cloud, storage, and infrastructure solutions to optimize deployment cost, scalability, and performance.
- Established reusable coding standards and Git workflows, reducing maintenance effort by 35% and improving development speed.
- Delivered Dockerized production deployments and AI-powered enterprise solutions with prediction accuracy up to 85%.

Full Stack Developer & Trainer | Demy Software Solutions **Jul 2023 – Dec 2024**

- Instructed 300+ students in MERN stack development, achieving a 90% project completion rate
- Guided students in building production-grade applications and mastering end-to-end development workflows
- Elevated student outcomes through hands-on, project-based learning methodologies

Software Developer Intern | Tilicho Labs **Dec 2022 – May 2023**

- Built full stack features using MERN stack in a collaborative development environment
- Developed and tested scalable web applications to ensure performance and reliability

PROFESSIONAL PROJECTS (Production & Client Work)

Design Daddy – Open-Source React UI Ecosystem

Role: Founder & Lead Engineer

1. Building a reusable React ecosystem targeting 50%+ reduction in repetitive UI development.
2. 1 npm install per module — UI, styles, and dependencies packaged together.
3. 40%+ lower implementation effort through reusable, configuration-driven components.
4. 50%+ lower change/rework effort through prop-based customization instead of component rewrites.
5. 1 theme configuration for centralized branding and styling across applications.
6. Standardized reusable architecture targeting 30%+ faster component integration across projects.

Tech: React.js, JavaScript, CSS, npm, REST APIs

Girinestham — Sports , Enterprise & Attendance Platform | Live: https://girinestham.com/

Role: Team Lead | Full Stack Developer

1. Led a ₹3L+ platform with 6+ modules for memberships, tournaments, donations, library, hostel & attendance.
2. Built Face Recognition + GPS attendance, making the process 80% faster.
3. Automated employee verification, cutting 100% of manual checking.
4. Made the system work with 3 storage options — Local, Supabase & AWS S3.
5. Compared 5+ cloud platforms and chose the setup that gave the best cost vs performance.
6. Compared multiple payment gateways and integrated PhonePe, saving 20%+ on transaction costs.
7. Built a live monitoring dashboard that helped find production issues 70% faster.
8. Made modules more configurable, reducing future development work by 40%.
9. Reduced dependency on specific vendors by 50%+ through flexible architecture.

Tech: React.js, Node.js, MySQL, Docker, Face Recognition, GPS, PhonePe

MG Hospital Medical Decision App (Production App)

Role: Full Stack Mobile Developer

1. Developed an AI-assisted clinical decision application used for real-time treatment recommendations.
2. Reduced doctor decision-making time by 60% through automated diagnosis assistance.
3. Achieved prediction accuracy of up to 85% using AI-powered recommendation models.
4. Converted Excel-driven workflows into a production mobile application.

Tech: Flutter, AI/ML

HR Management System — Multi-Branch HR & Attendance Platform | Live: https://hr.datapro.in/

Role: Full Stack Developer

1. Built an enterprise HR platform for multi-branch employee and attendance management.
2. Digitized HR operations, improving process efficiency by 40%.
3. Dockerized the application, reducing deployment effort by 70% across branches.
4. Developed reusable modules that accelerated future feature development.

Tech: MERN Stack, Docker

ADDITIONAL PROJECTS LED

MahiCommunity — E-Commerce Platform | Live: https://mahicommunity.com/

KEY ACHIEVEMENTS

- Led a ₹3L+ client project managing a team of 10+ members
- Delivered corporate training internationally (India & Singapore)
- Recognized as top trainer under Samsung Innovation Campus

EDUCATION

B.Tech – Computer Science Engineering **CGPA: 7.8**
